

PRISM+ SOFTWARE

Prism America prism-america.com

Long an extremely popular program in France, *Prism+* is now available with a newly revamped English-language interface. The richly featured program does everything from help plan observations to controlling telescopes, cameras, and complete observatories. And once your observations are done, *Prism+* will help process and analyze the data. There are algorithms for doing astrometry, photometry, image blinking, supernova searches, and much more.

U.S. price: from \$299

Dome control

The Dome control window includes a circular diagram of the telescope's field of view with cardinal directions N, S, E, and W. A blue circle indicates the current telescope position. To the right of the diagram are several control fields:

- Current position of dome: 133.2 °
- Current pos. wrt telescope: 133.2 °
- Azimuth difference: 0.0 °
- Telescope azimuth: 133.2 °
- New position (wrt dome abs.): 0 °
- Parking: North, South, East, West, User 0 °
- Dome-Telescope tracking:
 - Activate auto track
 - Max. Azimuth shift: 4.9999°
 - Link active:
 - Check every (minutes): 3
 - 1:17:25 PM (0.0°)
 - Rotate dome on telescope slewing

Buttons: Open, Close, Emerg. stop, Parked telescope , Emerg. close

State: Idle **Dome/shelter opened!** Comm.
